

ActiveSync via USB Port

1. Connect the USB sync cable to your computer
2. Install **ActiveSync 3.5** application and the Pocket LOOX drivers from your Companion CD
3. Once drivers have been properly installed, **Fujitsu USB Sync** will appear under device manager tab, as shown below

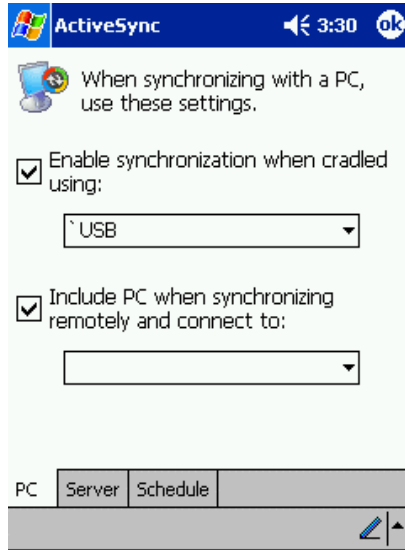

4. Execute **ActiveSync** on your desktop. Select File and click **Connection settings**, check box “**Allow USB connection with desktop**” as shown below

ActiveSync via USB Port

5. On your Pocket LOOX, go to **Start ® ActiveSync ® Tools® Option**. Then check box “**Enable Synchronization when cradled**” as shown

6. Connection will then be established
